

## AI Prompt Log

- Now I want to be able to place my ships
- I need a a cpu to fire back
- It doesnt look right
- I need two grids: one for my ships and one to fire at the opponent
- When I place my ships the squares need to all be right next to each other instead of being able to be placed anywhere
- I need to be able to place ships both horizontally and vertically
- I need error validation when placing ships
- Now I need the CPU to have the same number of ships as me (and of the same size)
